

A Snapshot of Occupational Licensing in Florida

Edward Timmons¹, Conor Norris¹, and Noah Trudeau^{1,2}

1: Knee Center for the Study of Occupational Regulation, West Virginia University

2: Troy University, Alabama

Occupational licensing makes it illegal to work in an occupation before meeting state-mandated entry requirements that often include minimum levels of education and training, paying fees to the state, and passing exams. Nationally, 21% of workers are licensed.¹

Licensing requirements for the same profession vary significantly across states. The 2023 State Occupational Licensing Index (SOLI) ranks states by the number of occupations that are licensed.² The SOLI database focuses on 331 occupations that are available in the Knee Center licensing database.³

Florida's SOLI ranking

In the 2023 SOLI, Florida ranks 36th nationally (with 1st being the most burdensome). Florida makes it illegal to work in 170 of the 331 occupations examined. This is 9 less occupations than the national average of 179, but more than 20 more than Kansas—the state with the fewest legal barriers (147) to working nationally.

Uniquely licensed occupations in Florida

Among the 170 occupations that Florida establishes minimum entry requirements to begin working, there are 22 occupations that are licensed in 20 states or fewer nationally. Table 1

³ <https://csorwvu.com/>

provides a full list of these occupations and there is also a separate excel file with full details for interested readers.

Florida is only state in the country to issue a separate license for gas line contractors and orthotic fitter assistants. Florida is also one of only 5 states to license mold inspectors, home improvement salespersons, and cemetery brokers.

Table 1: Uniquely licensed occupations in Florida

Occupation	Total States
Gas Line Contractor	1
Orthotic Fitter Assistant	1
Home Improvement Salesperson	5
Mold Assessor/Inspector	5
Cemetery Broker	5
Orthotic Fitter	6
Dental Radiographer	7
Mold Remediation Contractor	7
Septic Tank Cleaner	8
Auctioneer Apprentice	11
Irrigation Contractor	11
Pedorthist	11
Cemetery Salesperson	12
Anesthesiologist Aide/Assistant	14
Professional Fighting Announcer	14
Gas Fitter	15
Geologist in Training	15
Medical Clinical Laboratory Technician	15
Orthotist	15
Professional Boxer/Wrestler/Fighter Trainer	15
Prosthetist	16
Optician Apprentice/Trainee	18

Why Licensing Reform is Important

By making it illegal to work in 170 occupations, and uniquely licensing at least 22 occupations, Florida is imposing significant cost on its citizens.

Existing economic research suggests that occupational licensing raises prices by as much as 16%.⁴ Licensing also reduces employment by as much as 27% by making it more difficult to begin working in licensed professions.⁵ Nationally, it is estimated that occupational licensing results in 2 million fewer jobs being created each year.⁶

Although licensing may have historically resulted in some benefits to consumers⁷, there is little evidence that it is helping consumers in the present. Recent work finds little evidence that occupational licensing is improving the quality of services provided to consumers in the US and Europe.⁸

In summary, Florida currently places unique restrictions on its citizens to begin working. These restrictions are very costly and generate little to no measurable benefits for consumers. Following the lead of the majority of other states and choosing less restrictive ways to regulate and protect consumers would be in the best interest of Florida citizens.
