

A Snapshot of Occupational Licensing in Louisiana

Edward Timmons¹, Conor Norris¹, and Noah Trudeau^{1,2}

1: Knee Center for the Study of Occupational Regulation, West Virginia University

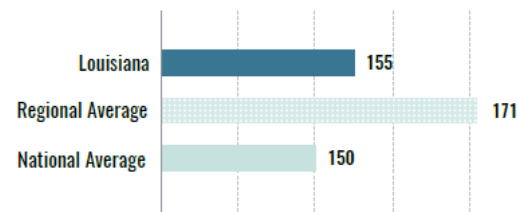

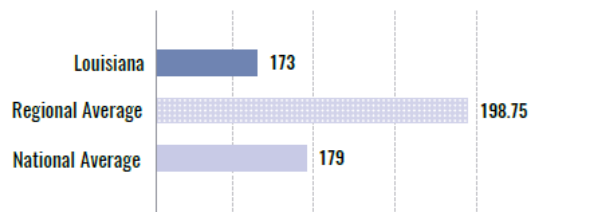

2: Troy University, Alabama

Occupational licensing makes it illegal to work in an occupation before meeting state-mandated entry requirements that often include minimum levels of education and training, paying fees to the state, and passing exams. Nationally, 21% of workers are licensed.¹

Licensing requirements for the same profession vary significantly across states. The 2023 State Occupational Licensing Index (SOLI) ranks states by the number of occupations that are licensed.² The SOLI database focuses on 331 occupations that are available in the Knee Center licensing database.³

Louisiana's SOLI ranking

In the 2023 SOLI, Louisiana ranks 33rd nationally (with 1st being the most burdensome). Louisiana makes it illegal to work in 173 of the 331 occupations examined. This is 6 less occupations than the national average of 179, but more than 25 more than Kansas—the state with the fewest legal barriers (147) to working nationally.

Uniquely licensed occupations in Louisiana

Among the 173 occupations that Louisiana establishes minimum entry requirements to begin working, there are 22 occupations that are licensed in 20 states or fewer nationally. Table 1

³ <https://csorwvu.com/>

provides a full list of these occupations and there is also a separate excel file with full details for interested readers.

Louisiana is one of only 2 states in the country to issue a separate license for tradesman plumbers. Louisiana is also one of only 4 states to license certified prevention professionals (CPPs) and one of 7 that licenses mold remediation contractors. Although the occupation is not included in the Knee Center database, Louisiana is the only state in the country that licenses florists.

Table 1: Uniquely licensed occupations in Louisiana

Occupation	Total States
Tradesman Plumber	2
Interior Designer	3
Certified Prevention Professional (CPP)	4
Mold Remediation Contractor	7
Journeyman Gas Fitter	8
Master Gas Fitter	9
Gas Fitter Trainee/Apprentice	10
General Commercial Contractor	10
Auctioneer Apprentice	11
Irrigation Contractor	11
License Piping Contractor	11
Professional Fighting Announcer	14
Chiropractor Assistant	15
Gas Fitter	15
Geologist in Training	15
Medical Clinical Laboratory Technician	15
Polysomnographic Technologist	15
Professional Wrestler	15
Pyrotechnic Operator	17
Perfusionist	18
Sanitarian In Training/Trainee/Aide	19
Behavior Analyst Assistant	20

Why Licensing Reform is Important

By making it illegal to work in 173 occupations, and uniquely licensing at least 22 occupations, Louisiana is imposing significant cost on its citizens.

Existing economic research suggests that occupational licensing raises prices by as much as 16%.⁴ Licensing also reduces employment by as much as 27% by making it more difficult to begin working in licensed professions.⁵ Nationally, it is estimated that occupational licensing results in 2 million fewer jobs being created each year.⁶

Although licensing may have historically resulted in some benefits to consumers⁷, there is little evidence that it is helping consumers in the present. Recent work finds little evidence that occupational licensing is improving the quality of services provided to consumers in the US and Europe.⁸

In summary, Louisiana currently places unique restrictions on its citizens to begin working. These restrictions are very costly and generate little to no measurable benefits for consumers. Following the lead of the majority of other states and choosing less restrictive ways to regulate and protect consumers would be in the best interest of Louisiana citizens.
